

Vital Statistics Quarterly Digest

Volume 20
Number 3
March 2011

Vital
Statistics

Vital Statistics Agency

Preface

This *Quarterly Digest's* standard tables of vital event statistics are for the third quarter (July to September) of 2010 with year-to-date totals.

We remind the readers that Vital Statistics Agency information is continuously updated. For this reason, quarter and year-to-date summary statistics may not correspond exactly to statistics found in previous or later publications. The information in this report should be considered “provisional” and therefore subject to revision. This is particularly true for statistics involving death by sudden and unexpected causes (injuries, for example) where a coroner investigation may be required. The reader is also cautioned regarding the random fluctuations in values, especially those involving small counts.

We welcome any comments or questions about the data presented here, as well as requests for information not supplied in our regular publications. We also welcome suggestions from readers for future changes or additions to this report. Contact information is provided at the back of this report (Readers' Note), via the electronic “feedback form”.

Table of Contents

Preface..... i
 Map: B.C. Local Health Areas.....4
 Local Health Areas (LHA) within Health Service Delivery Area and Health Authority.....5

Tables: July 1 - September 30, 2010 and Year-To-Date

Vital Event Statistics

(Population, Livebirth, Death, Marriage, Stillbirth, Infant Deaths)

1A by Local Health Area6
 1B by Health Service Delivery Area.....7
 1C by Health Authority7

Selected Birth Statistics

(Low Birthweight, Preterm, Teenage Mother, Elderly Gravida, Cesarean Section)

2A by Local Health Area8
 2B by Health Service Delivery Area9
 2C by Health Authority9

External Causes of Death

(Unintentional injuries - [Motor Vehicle Accidents, Poisoning, Falls, Burns/Fire, Drowning, Other], Suicide, Homicide, Other External Causes)

3A by Local Health Area10
 3B by Health Service Delivery Area11
 3C by Health Authority11

Neoplasm Deaths

(Lung, Female Breast, Colorectal, Other G.I., Female Reproductive, Prostate, Blood/Lymph, Other Malignancy, Nonmalignant and Unspecified)

4A by Local Health Area12
 4B by Health Service Delivery Area13
 4C by Health Authority13

Heart Disease Deaths

(Rheumatic/Valvular, Hypertension, Ischemic, Conductive & Dysrhythmic, Heart Failure, Congenital, Other)

5A by Local Health Area14
 5B by Health Service Delivery Area.....15
 5C by Health Authority15

Respiratory Disease

(Emphysema, COPD, Pneumonia, Influenza, Asthma, Lung Disease from External Agents, Pulmonary Fibrosis, Other Respiratory)

6A by Local Health Area	16
6B by Health Service Delivery Area.....	17
6C by Health Authority	17

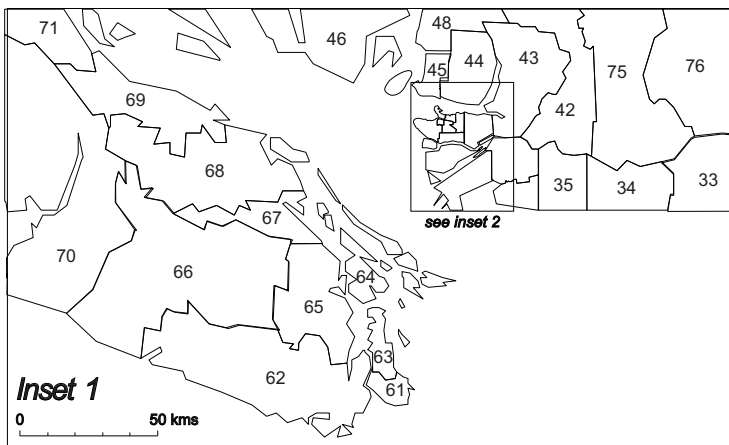

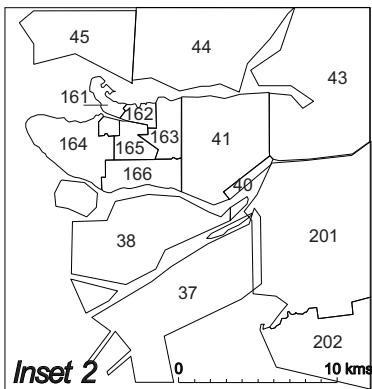

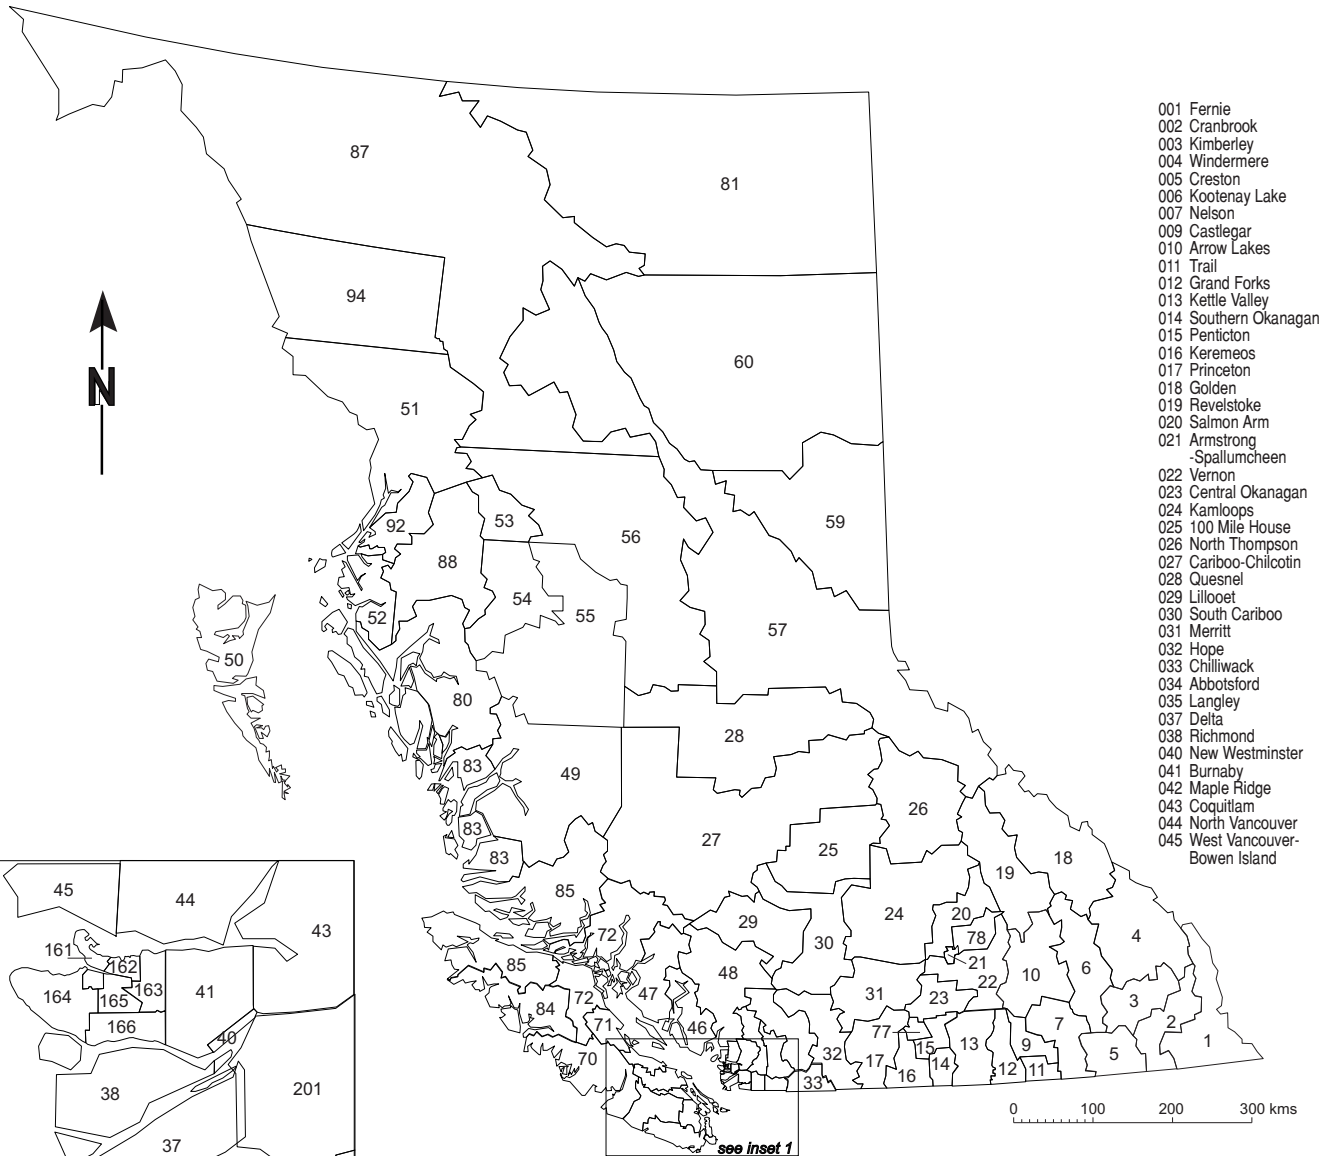

Other Selected Death Statistics

(Diabetes, Alcohol-Related, AIDS, Other Infectious Disease, Cerebral & Other Vascular, Liver Disease, Amyotrophic Lateral Sclerosis & Multiple Sclerosis, Alzheimer's Disease, Parkinson's Disease)

7A by Local Health Area	18
7B by Health Service Delivery Area	19
7C by Health Authority	19

Glossary

Age Standardized Mortality Rate (ASMR): A summary of age adjusted death rates by gender which have been standardized to a specific population for the purpose of rate comparisons of different time periods or different geographical locations. ASMRs in this report are per 10,000 standard population (1991 Canada Census).

Alcohol-Related: This category includes all deaths considered as being directly or indirectly related to alcohol as indicated by inclusion by the certifier of selected alcohol identifying conditions anywhere on the death record (including “lifestyle” field). It should be noted that where alcohol is an indirect cause of death (i.e. not UCOD) and the direct underlying cause of death falls within one of our selected causes (e.g. motor vehicle accidents), then this death may be counted in both columns. That is, not all of “alcohol-related” are exclusive. This category includes the ICD-10 codes: F100-F109, K700-K709, O993, P043, O354, Q860, G312, G621, G721, I426, K292, K860, X45, X65, T510-T512, T519. **Note:** now excludes acute pancreatitis, and cirrhosis not specifically identified as alcohol induced.

Assignment of Health Service Delivery Area (HSDA) and Health Authority (HA): Cases are assigned to Health Service Delivery Areas and Health Authorities by the aggregation of appropriate LHAs.

Assignment of Local Health Area (LHA): Allocation of LHA, in the case of births and deaths is based upon the usual residence (by postal code) of the mother and deceased respectively. Marriages are assigned to LHAs according to the place of the event. Community name is used in the absence of postal code.

Elderly Gravida: Any mother who was 35 years of age or older at the time of delivery of a live born infant.

External Causes of Death: Deaths due to environmental events, circumstances and conditions as the cause of injury, poisoning, and other adverse effects. Broad categories include unintentional injuries, suicide, medical or abnormal reactions (considered unintentional injuries), homicide, legal intervention, misadventures (counted as unintentional injuries) and injury from war operations. Standard “Quarterly” tables under this heading include deaths due to unintentional injuries, suicide, homicide, and other. Unintentional injuries are subdivided by the following categories; motor vehicle accidents (MVA) (V020-V049, V090-V099, V120-V149, V190-V196, V200-V799, V803-V805, V820-V821, V823-V839, V840-V878, V880-V888, V8900-V8909, V8920-V8929, V8990-V8999, Y850), poisoning (X40-X49), falls (W00-W19), burns/fire (X00-X19), drowning (V900-V909, V920-V929, W65-W74), other unintentional injuries (V010-V019, V050-V069, V091, V099, V100-V119, V150-V189, V198-V199, V250-V259, V350-V359, V450-V459, V550-V559, V650-V659, V750-V759, V800-V802, V806-V819, V822, V879, V889, V910-V919, V930-V949, V950-V978, V98-V99, W20-W64, W75-W99, X20-X39, X50-X59, Y40-Y849, Y859, Y86, Y880-Y883). Suicide ICD-10 codes are X60-X84, Y870; homicide (X85-Y09, Y871); “other [external]” consists of events of undetermined intent, legal interventions, and operations of war (Y10-Y369, Y890-Y899).

Note: the late effects of unintentional poisoning, falls, and burns/fire are no longer identified separately for inclusion in these categories and are now part of “other accidents”). Trains are now considered motor vehicles in ICD-10 but for consistency, have been excluded from MVA counts to still be considered as “other transport”.

Heart Disease: Tables under this heading include deaths due to:

- rheumatic/valvular: (I050-I099, I340-I38)
- hypertension/hypertensive: (I10-I159)
- ischemic: (I200-I259) (**Note:** now includes cardiomyopathy specified as ischemic)
- conductive and dysrhythmic: (I440-I499)
- heart failure: (I500-I509)
- congenital: (Q200-Q249)
- other: pulmonary (I260-I289), inflammatory (I300-I311, I319-I339, I400-I409, I514); cardiomyopathy (I420-I429) (**Note:** now excludes ischemic); other ill-defined and unspecified heart disease (I312-I318, I510-I513, I515-I519) (includes myocardial degeneration)

ICD-9: The ninth revision of *International Classification of Diseases*, World Health Organization, Geneva, 1977. An internationally used system of approximately 12,000 four (and some three) digit numbers representing a system of categories to which morbid entities are assigned according to an established criteria. ICD provides a common basis of disease and injury classification that facilitates storage, retrieval, and tabulation of statistical data.

ICD-10: The tenth revision of *International Classification of Diseases and Related Health Problems*, World Health Organization, 1992. In use beginning with year 2000, update of ICD-9 revised with alpha-numeric system and increased code detail (approximately 18,000). The BC Vital Statistics Agency and all their provincial counterparts utilize an ICD-10 that has been modified by the National Center for Health Statistics (NCHS) for use in the classification and analysis of medical mortality data in the United States (October, 1998).

Infant Deaths: Deaths of children under one year of age.

Live birth: The complete expulsion or extraction from its mother, irrespective of the duration of the pregnancy, of a product of conception in which, after the expulsion or extraction, there is:

- (a) breathing;
- (b) beating of the heart;
- (c) pulsation of the umbilical cord; or
- (d) unmistakable movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta attached.

Low Birth Weight: Any live born infant weighing less than 2500 grams.

Neoplasms: (ICD-10 C000-D489). Although the vast majority of deaths in this category are due to malignant cancer, also included are benign, in-situ, and unspecified "tumors". Detailed ICD-10 breakdown used in "Neoplasm Deaths" tables are:

- lung: includes trachea, bronchus, lung, and pleura (C33, C340-C349, C384, C450). **Note:** now excludes mesothelioma of lung and trachea.
- female breast: (C500-C509)
- colorectal: (C180-C218)
- other G.I.: includes esophagus, stomach, small intestine and duodenum, liver and intrahepatic bile ducts, gallbladder and extrahepatic ducts, pancreas, peritoneum, other and ill-defined within digestive organs (C150-C179, C220-C269)
- female reproductive: includes uterus, cervix, placenta, ovary and adnexa, vagina and external genitalia (C510-C58)
- prostate: C61
- blood/lymph: includes lymphatic and haematopoietic tissue (C810-C969, C463)
- other malignancy: includes malignant neoplasms of other (e.g. lip, oral cavity, pharynx, nose ear, larynx, heart, bone and connective tissue, urinary tract, eye, brain, endocrine glands) and ill-defined or unspecified sites (C000-C148, C300-C449, C451-C462, C467-C499, C600-C609, C620-C768, C5091*, C80*). **Note:** * codes used exclusively by BC Vital Statistics Agency for male breast cancer and for unknown primary site cancer.
- non malignant and unspecified: includes benign, in-situ, and neoplasms of uncertain or unknown behaviour (D000-D489). **Note:** This neoplasm group now includes myeloproliferative disease, thrombocythemia, monoclonal gammopathy, and lymphoproliferative disease which were not previously considered neoplastic in ICD-9 and were counted in other ICD chapters.

Other Selected Death Statistics: Tables under this heading include deaths due to:

- diabetes: (E100-E149)
- alcohol-related: (see previous page)
- AIDS/HIV: (B200-B24)
- other infectious and parasitic disease: (A000-B199, B250-B999, U049) **Note:** Now includes obstetrical and neonatal tetanus.
- cerebro and other vascular disease: (I600-I698, I700-I879, I950-I959, I880-I899, I970-I979, I99). Includes cerebrovascular disease, disease of arteries and veins, hypotension, and other circulatory system disease. **Note:** "Other circulatory system disease" now includes post procedural disorders of the circulatory system (I970-I979) which are never selected as the UCOD. However they are confirmed by editing and either recoded to the more specific disease (embolism, stroke, M.I.) or double coded if the complication is confirmed.
- liver disease: (K700-K7699). **Note:** Now includes toxic liver disease with cholestasis.
- ALS/MS: Amyotrophic lateral sclerosis and multiple sclerosis: (G122, G1221, G35). **Note:** In order to maintain continuity with ICD-9, unspecified motor neuron disease (G122) is included in this category as it was previously not distinguishable from ALS.

Premature/Pre-term: Any live born infant less than 37 weeks gestation at delivery.

Respiratory Disease Death Statistics: Tables under this heading include deaths due to the following:

- emphysema: (J430-J439) **Note:** Now excludes when described as or resulting in obstructive disease –see note at COPD.
- COPD: (440-J449). **Note:** Now includes specific code within the group for COPD when accompanied with acute lower respiratory infection, or with acute exacerbation. This inclusion has no statistical impact on UCOD. Also, this category now includes asthma and emphysema described as obstructive not previously included in ICD-9.
- pneumonia: (J120-J181, J188-J189) **Note:** ICD-10 has a new code for chlamydial pneumonia (J160). It is uncertain if this condition would have previously been coded to “pneumonia due to other specified bacteria” (ICD-9 4828) or to “other diseases due to viruses and chlamydia” (0788), or to both. This disease is very rare on death records so if not coded to 4828, the impact to comparison of historical data would still be minimal. Daily VS edits have been implemented to ensure consistent selection of pneumonia.
- influenza: (J09-J118)
- asthma: (J450-J459, J46). **Note:** Now excludes when described as obstructive – see note at COPD.
- lung disease due to external agents: (J60-J709)
- pulmonary fibrosis: (J841)
- other respiratory diseases: (J00-J069, J182, J200-J42, J47, J80-J840, J848-J9899). **Note:** Now includes post procedural respiratory disorders (J950-J959) which formerly used to be injury codes. These codes are never selected as the UCOD so their impact would only effect multiple code analyses. The Vital Statistics Agency includes these in daily data edits to confirm them as post procedural and to double code for the specific respiratory condition (e.g. pneumonia). As a result, respiratory disease statistics in BC are more consistent with historical data.

Standardized Mortality Ratio (SMR): The ratio of the number of deaths occurring to residents of a geographical area (e.g. LHA) to the expected number of deaths in that area based on provincial age specific mortality rates.

Stillbirth: The complete expulsion or extraction from its mother after at least twenty weeks of pregnancy or after attaining a weight of at least 500 grams, of a product of conception in which, after expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle.

Teenage Mother: Any mother who was age 19 or less at the time of delivery.

UCOD: Underlying cause of death – based upon application of standard international coding rules and medical expertise for determining consequential relationships of conditions and diseases from immediate cause backwards to underlying cause.

Contributors' Note:

The editorial staff would like to invite any researchers of health-related topics who wish to contribute an article or paper summary for publication in this Quarterly Digest to contact the editor. Articles should focus on health status issues in British Columbia. It is preferable that submissions be in "electronic media" format (e.g. Word, Word Perfect, Excel, Power Point, Corel, Pagemaker, etc.). Article presentation will be subject to space allowances and publishing deadlines.

Readers' Note:

This publication and the Vital Statistics Annual Report are available at our web site,
